Notice

Entry Control by Barcode
To eliminate the hassle you encounter at the booth such as providing name cards and filling the forms, the exhibition employs the bar code system.
In case you have your bar code on the attendee badge scanned at booths, Organizer submits your registered profile to the third parties such as exhibitors and sponsors.
Your personal information submitted to the third parties will be managed under the responsibility of individual third parties. Your information might be used for the variety of purposes such as delivery of product & service info, seminar notices and surveys. Show your attendee badge to the booth attendants with the above knowledge in mind.

Three days to experience future MONODZUKURI!

Various sessions, seminars and events will be held centered on three themes!

MONODZUKURI

In addition to booths from nearly 300 companies exhibiting their latest technologies and seminars organized by the exhibitors, there will also be Keynote sessions and a panel discussion held jointly by the three organizing industrial associations to discuss MONODZUKURI (the art of manufacturing) in the future.

Human resources

This will be an opportunity to think more broadly about human resources issues faced by various industries. Additionally, the College and University Technical Academy Research Presentations will be held, which is a project aimed at supporting students who will be the future leaders of MONODZUKURI.

Global

Keynote sessions and the World MONODZUKURI Forum will present key words linked to furthering the evolution of Japanese MONODZUKURI within the world's manufacturing industries.
